## First Formative Assessment (Test-4)

Dear parents

We are starting with Test 4 in the First Formative Assessment soon. You must have noticed that the assessment is continuous and from small portions. We want to remove student's dependence on parents for learning. So before the assessment subject teachers will revise lessons with students and sort out their difficulties. Children have to learn now to speak about their difficulties and difficult areas in the lesson and should become responsible and independent self learners. As each child has his/her own learning style, let us allow them to take responsibility of their own progress. As this test has very little weight age in the total assessment, please do not be anxious and let children prepare on their own.

***Thank You***
