

INDIAN LEARNERS' OWN ACADEMY, KUWAIT

LKG Report on Origami Competition

DATE - 4th January 2021

TIME – 6:40 PM to 7:10 PM

Origami is a wonderful tool to teach spatial skills, understanding of space and the relationship between shapes. Origami aids in bi-lateral development of the brain. To trigger the imagination of the tiny tot's and enhance their creative skills. The paper folding craft was not only a fun filled experience, but it also develops artistic skills in the young ones. The KG section of ILOA conducted the origami competition on the 4th of January 2021, Monday during the virtual class.

Children participated in this creative activity with great enthusiasm and pleasure. They created beautiful paper crafts of flowers, animals, trees and butterflies with colourful papers. Children were very happy with the crafts they created.

Thank you!
